DETAILED ACTION

Reason for Allowance

The following is an examiner's statement of reasons for allowance:

The primary reason for allowance is for at least the reason of the inclusion of a plurality of bit lines selection switches which are connected to one-side ends of the odd-numbered bit lines and are connected to the other-side end of the even-numbered bit lines, respectively. The so called unit (bit lines selection) circuits are arranged on both sides of the memory array in such a manner that a pair of odd-numbered or even-numbered bit lines are connected to the two terminals via the switches, respectively so that when one of the word lines used in the memory array is selected, the memory cells connected to the word line can be electrically connected to the terminals of the unit circuits in such a manner that one memory cell is connected to each terminal.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hien N Nguyen whose telephone number is (571) 272-1879. The examiner can normally be reached on Monday through Thursday 9:30 AM to 7:00 PM..
